

GRIP-TWIST® XT MECHANICAL SPLICES

COLD-SWAGED STEEL COUPLER WITH TAPER THREADED ENDS & OPTIONAL FLANGE

- **FOR HIGH STRENGTH, LOW CARBON, CHROMIUM STEEL BARS, ASTM A1035**
- **FAST, EFFICIENT INSTALLATION** – Eliminates long lap lengths and reduces congestion.
- **DEVELOPED STRENGTH** – 1.25 x specified yield strength (f_y) ASTM A1035 Grades 100 & 120.
- **ULTIMATE CAPACITY** – ASTM A1035 Grades 100 & 120, equal to 150 ksi.
- **FULL MECHANICAL SPLICE** – ACI 318–19 Chapter 18 - Exceeds specified tensile strength (f_u) ASTM A615 Grade 100, equal to 115 ksi.
- **CONVENIENCE** – No special bar end preparation or thread cutting – Easy visual inspection. Can be pre-installed using a BPI shop press in a controlled environment. For bars #4 – #18 (\varnothing 13 – 57 mm).

** MATCHING THREAD SIZE COINCIDES WITH LARGER, STANDARD GRIP-TWIST® DoughNUT™

TAPER THREADED GRIP-TWIST® XT – Equipment and Installation

A Bench Press BP2600 fitted with a two-piece die set and powered by an electrically-driven hydraulic pump is used by the rebar fabricator to efficiently swage Grip-Twist® XT coupler components. The equipment operator depresses a foot control to actuate the system. As the ram extends and pushes the dies towards each other, the coupler component is forced to deform around the rebar and interlock with the bar profile. When a swaging bite has been completed, a pressure switch automatically stops the process and the operator retracts the ram for the next bite. For ease of use, swaging dies are color coded to indicate the rebar and coupler size. Color codes are shown on Grip-Twist® XT Dimensions and Data Charts.

NOTE: Taper Threaded Grip-Twist® XT coupler components are dimensionally different from standard Grip-Twist® products. Consequently, the swaging dies that are used to swage the Grip-Twist XT components are color coded differently from the swaging dies used to swage standard Grip-Twist products.

* COLOR CODE OF COUPLER MUST MATCH COLOR OF DIE SET

BP2600

Bench press for swaging all sizes up to #18 [Ø 57mm].
Double acting cylinder produces 300 tons of force connected to 10 or 15 hp pump for high fabrication shop productivity.
Press includes foot control, lifting eyes and leveling feet.

BPI® Equipment is available for lease or purchase.

Equipment must be used in accordance with manuals, lease agreements, manufacturers' directions and all safety instructions.
